

Modules

Module	In brief	Module	In brief
3-input Adder (shader)	Weighted three-signal mixer	3-input Multiplier (shader)	Three-way signal multiplication
3D Rotation	Rotate geometry in 3D	3D Source Editor	Position sound sources in 3D
4D Rotation	Rotate geometry in 4D	A recording becomes a playable physical gesture. (instrument)	Recording pitch and syllable analysis
Abdominal Modes	Low abdominal body resonances	Acoustic Occurrence Graph	Graph of individual recorded events
Acoustic Profile Selector	Choose acoustic analysis settings	AcousticManifold (instrument)	Recording analysis and graph resynthesis
Adaptive Airway Lab (instrument)	Anatomical oscillator and filter controls	Additive Drawbar Organ (shader)	Nine-rank additive organ
Additive organ (SIMD source)	Nine moving organ drawbars	Affine Transform	Move, rotate and scale geometry
Air Swoosh (shader)	Sweeping partials and air noise	Airflow Objects (physical model)	Blown cavities, wires and pipes
Algorithm Trace	Computation steps as musical scores	Algorithmic Mazes (instrument)	Maze generation and passage geometry
Alien Larynx (instrument)	Coupled larynx and propagation model	Alpha-Beta Minimax (instrument)	Game-tree search as musical events
Alternating taps (srtuss: noir et blanc)	Eleven alternating stereo echoes	AM / Tremolo (shader)	Tremolo and amplitude modulation
Amplitude quantizer (shader)	Stepped amplitude distortion	Amplitude to MIDI (Composer)	Amplitude to MIDI expression
Analytic Chirp Sweep (shader)	Curved pitch sweeps and pings	Analytic Glide Oscillator (shader)	Phase-continuous pitch glides
Analytic Plucked String (shader)	Damped plucked-string modes	Analytic Wave Terrain (shader)	Scan a procedural height field
Anatomical Section Editor	Direct airway shape editing	Annealogue (instrument)	Three-qubit annealing sonification
Arc-Length Reader	Constant-distance path traversal	Articulation Controller	Manage call and gesture lifecycles
Asset Loader	Load reusable media resources	Asset Selector	Choose media resources
Atomic Orbitals (instrument)	Hydrogen-orbital fields and nodes	Audio Analysis Field (shader)	Waveform history and audio features
Audio Merge	Combine identified audio channels	Audio Output	Send audio to speakers
Audio Recorder	Record an audio bus	Audio Split	Split audio channels and routes
Audio Strip (shared widget)	Grouped audio-session controls	Audio to FFT bands (Composer)	Spectral-band energy to controls
Automatapoia (instrument)	Elementary and totalistic automata	Automation Lane	Play recorded control curves
Baleen Source	Coupled baleen vocal source	Band Follower	Track energy within frequency bands
Bass sweep (srtuss: DnB)	Falling sine-bass sweep	Batch-of-patches renderer (runtime proposal)	Batch audition and patch export
Bell Square (instrument)	Two-atom collision-phase model	Bend Technique	Harmonica bending techniques
Bilateral Balance	Balance paired sound sources	Bilateral Bird Labia	Paired bird vocal sources
Bitmask Rhythm (shader)	Sixteen-step gates and accents	Bleep echo (srtuss: Noise Bands)	Bleep with asymmetric stereo echoes
Blowhole (instrument)	Animal voices and call gestures	Blowhole Valve	External blowhole airflow valve
Body Gesture Controller	Coordinate persistent body gestures	Body-Part Picker	Select anatomical control targets
Boidzoid (instrument)	Flocking agents as musical controls	Boundary Slap Exciter	Wet body-boundary impacts
Bowed Things (physical model)	Bowed bars, bowls and cymbals	Brain Control In	Receive companion-app controls
Brain Control Out	Send companion-app controls	Branch Audio Processor	Branch-specific captured audio histories
Branch Player	Play branching structures	Branch View	Show branches and traversal contacts
Branches to Notes	Branch turns to musical notes	Breath Load	Inhale and exhale resistance
Breath Pad	Signed breath gesture surface	Bubble Cloud	Bubbles, pinches and ruptures
Button (shared widget)	Trigger a user action	Bytebeat (shader)	Bitwise lo-fi melody and rhythm
Calibration Panel	Speaker-channel testing interface	Call Contour Editor	Edit animal-call trajectories
Call Contour Score	Sequence pressure, pitch and articulation	Camera Mask Editor	Choose camera control regions
Camera Tracker	Extract camera tracking data	Candy Coil Delay (instrument)	Moving delay-head trajectories
Cantilever Reed	Reed pitch independent of mouth	Cantor Delay (recursion study)	Recursively branching delay timings
Cantor Lock (instrument)	Paired Cantor position/frequency masks	Cantor Masks	Generate Cantor position/frequency masks
Carrier Analyzer	Estimate cricket carrier frequency	Cascade FM (SIMD source)	Four-operator modulation voice
Cascading FM	Cascaded frequency modulation	Cascading FM (instrument)	FM chain with tapered depth
Cascading PM	Cascaded phase modulation	Cascading PM (instrument)	Phase chain with frequency ratios
Cell Crossing	Cell crossings to triggers	Cell Reader	Traverse identified musical cells
Cellular Automaton	Evolve binary cell patterns	Cellular Automaton Score (shader)	Automaton cells as gates
Chance Gate	Seeded probabilistic event filtering	Chance gate (Composer)	Probabilistic trigger filtering
Channel Calibrator	Check physical speaker assignments	Channel Matrix	Explicit multichannel routing matrix
Chaotic FM	Nonlinear frequency-modulation synthesis	Chaotic FM (instrument)	Bounded nonlinear FM chains
Chaotic PM	Nonlinear phase-modulation synthesis	Chaotic PM (instrument)	Recursive phase-shaping comparison
Charge Garden (instrument)	Charge fields and moving tracers	Cheek Resonator	Cheek cavity resonance
Chladni Plate (instrument)	Vibrating plate modes and nodes	Choice Switch (shared widget)	Compact option selector
Chord Arpeggiator (shader)	Arpeggiate chords and inversions	Chord pad (srtuss: Cipher)	Three additive Lydian pads
Chorus (shader)	Detuned stereo delay ensemble	Circle Generator	Generate a closed circular path
Circular history read (runtime proposal)	Read retained stereo sample history	Clap Burst (shader)	Layered clap noise bursts
Click Exciter	Oral click excitation	Clock	Generate musical clock pulses
Clock (Composer)	Pattern-driven clock pulses	Clock / MIDI sync (Composer)	Synchronize triggers and MIDI clocks
Clock Divider	Pass every nth clock pulse	Clock divider (Composer)	Divide incoming clock rate
Clock Duck (shader)	Clock-synchronized gain ducking	Clock Multiplier	Subdivide incoming clock pulses
Clock multiplier (Composer)	Multiply incoming clock rate	Clock phase (Composer)	Offset clock pulse timing
Clock phase (shader)	Repeating phase with swing	Closed + open hats (srtuss: DnB)	Fast and slow metallic hats
Collision Detector	Detect impacts versus resting contact	Compliant Compartment	Pressure in deformable digestive chambers
Compressor	Audio dynamic-range compression	Compressor (Composer)	Audio dynamic-range compression
Compute-to-audio streaming bridge (runtime proposal)	Shader samples to continuous audio	Configurable Two-Source Voice	Pair two SIMD voice models
Consonant Exciter	Speech consonants alongside tonal resynthesis	Constant (shader)	Fixed numeric control source
Constraint Solver	Simulate constrained motion	Constriction Adapter	Anatomy to vocal-tract configuration
Contact Network	Connected force-bearing contacts	Contact to Trigger	Contacts and crossings to attacks
Contact Tracker	Track persistent contact identities	Continuous Percussion Morph	Morph across percussion timbres
Continuous Voice Bank	Sustained voices, notes and drums	Continuous Voice Controller	Keep voices bound to sources
Contour Extractor	Field boundaries to paths	Contour Generator	Generate reusable shape contours

Module	In brief	Module	In brief
Control Section (shared widget)	Group related interface controls	Convolution Maw (recursion study)	Recursive self-convolution of audio
Convolution Reverb (shader)	Scattered stereo reflection taps	Convolution Space (shader)	History-based body and room approximations
Coupled Larynx	Interacting laryngeal sound sources	Creaturazoid (instrument)	Persistent body and gesture bank
Crickets (instrument)	Cricket carrier and chirp analysis	Cross-App Audio Stream	Timed audio between companion apps
Crossed Pitch and Tempo Banks	Independent pitch and tempo illusions	Crossfade	Blend two audio sources
Cube Score	Cube stickers as musical cells	Curve Editor	Edit response curves
Curve Mapper	Remap controls through curves	CV Curve Mapper (shader)	Scale, bend and limit controls
Cyclic Fractal Noise (shader)	Looping fractal-noise textures	Cyclic Pitch Mapper	Geometry to cyclic pitch
DDSP Resynth (shader)	Harmonic and noise resynthesis	Delay	Delay with bounded feedback
Delay (Composer)	Repeat retained audio history	Dentaphone (instrument)	Playable thirty-two-tooth surface
Depth to Timbre	Recursion depth to timbre	Detuned melody (struss: noir et blanc)	Sine melody with added harmonics
Digestazoid (instrument)	Digestive chambers and material mixtures	Directional Spatializer (shader)	Directional and binaural spatial cues
DJ Dijkstra (instrument)	Weighted-grid path-search sonification	DNA Translator (instrument)	DNA sequence and codon scanning
Domain-warp Time Field (shader)	Warped fields as controls/gates	Doppler Sweep (shader)	Motion-driven delay and Doppler pitch
Dorian PWM arp (struss: Shift)	Dorian pulse-width arpeggio	Double Pendulum (instrument)	Paired chaotic pendulum simulations
Drum Controller	Send attacks to percussion banks	Drum Mapper	Map geometry events to drums
Drum Roll Please! (instrument)	Continuously accelerating Risset rhythms	Drum voice (Composer)	Trigger-driven percussion voice
Dry compute pass (runtime proposal)	Render dry shader audio/history	Dry signal graph (runtime proposal)	Clock, pitch and layered synthesis
Dual Constriction	Two vocal-tract constrictions	Dual Effects	Two selectable, reorderable effects
Dust bursts (struss: Boulder Dash title)	Gritty gated noise swells	Dynamics (shader)	Peak tracking and dynamics control
Edge-Tone Flute	Flute edge-tone excitation	Effects compute pass (runtime proposal)	GPU filtering, delay and reverb
Engine tone (struss: Industry II)	Vibrating engine and sine carrier	Entanglement Dance (instrument)	Entangled-state motion sonification
Envelope	Amplitude and modulation envelopes	Envelope (Composer)	Triggered or gated envelopes
Envelope Editor	Edit articulation envelopes	Enveloper (instrument)	Nested envelope-tree sequencer
Equal-power pan (shader)	Equal-power mono-to-stereo panning	Escape Dust (instrument)	Open baker-map survivor fractals
Escape Flux	Escaping map points to accents	Escher (instrument)	Wallpaper symmetry and recursive motifs
Euclidean Arpeggiator (shader)	Evenly spaced scale arpeggios	Euclidean Gate (shader)	Evenly distributed rhythmic gates
Euclidean pulse (Composer)	Evenly distribute pulse-cycle hits	Euclidean Pulse (instrument)	Euclidean remainder and pulse cells
Euclidean Sequencer	Evenly distribute sequencer attacks	Event contour (shader)	Phase-driven attack/decay contour
Event Rate Converter	Convert event clock domains	Expandable Instrument	Reusable graph with expandable internals
External Processor Adapter	Connect an external audio processor	Fabric Filter (instrument)	Colored noise and wave fields
Face Gesture	Coordinate exclusive facial gestures	Face Picker	Select facial articulation regions
Falling Forms (instrument)	Falling-body contact and friction	FBM thunder (struss: Gravity Shielding)	Layered fractal-noise thunder strikes
Feature Extractor	Measure geometry or signal properties	Feature Inspector	Inspect features before musical mapping
Feature Join	Join measurements by object identity	Feature Manifold View	Explore recording-feature graphs
Feature Select	Select features by meaning/identity	Feature to Brain Control	Features to companion-app controls
Feature to OSC	Features to OSC messages	Feedback Network (shader)	Shared-history echo and diffusion network
Feeding Exciter	Feeding and mouth-action sounds	Feral Fairy Ferris Ferry (instrument)	Nested moving-shape sequencer
FFmpeg Wasm (instrument)	Worker-processed short audio captures	FFT / short-time spectrum (runtime proposal)	Audio blocks to spectral bins
FFT Robotizer (shader)	Fixed-phase robotic spectral effect	Filter	Low-, high- and band-pass filtering
Filter (Composer)	Shape the audio spectrum	Filter Hydra (recursion study)	Recursive low/high spectral branching
Filter Router	Route configurable filter networks	Finite Wave	Finite-wave evolution model
FIR Band-pass (shader)	Finite-impulse band-pass filter	FIR High-pass (shader)	Finite-impulse high-pass filter
FIR Low-pass (shader)	Finite-impulse low-pass filter	Flanger (shader)	Moving-delay comb-filter sweep
Flock Model	Autonomous flocking-agent simulation	Flow Advection	Transport field data through flow
Flow-field Advection (shader)	Particle advection with moving attractor	Fluid Mixture	Wet-body material mixture state
FM / PM voice (shader)	Carrier/modulator FM and PM	FM Drum Bank	Sixteen-voice FM percussion bank
FM Drums (instrument)	FM/noise kit with voice envelopes	FOF Formant Voice (shader)	Pitched, damped vocal-formant pulses
Foot Contact Features	Detailed foot-contact measurements	Formant Bank (shader)	Vowel-shaped harmonic weighting
Formant bank (SIMD source)	Vowel-weighted harmonic synthesis	Fourier and Epicycle Bank	Shared curve and sound coefficients
Fourier Epicycles (instrument)	Fourier curves through rotating epicycles	Fractal Orbit-trap Events (shader)	Fractal orbit proximity to events
Fractal Recurrence (shader)	Bounded fractal-recurrence synthesis	Free-Reed Bank	Bidirectional free-reed sound sources
Freehand Path Editor	Draw timed playable paths	Frequency Fabric	Mass-spring frequency surface
Frequency to MIDI (Composer)	Frequency to MIDI pitch	Frequency Tracker	Pitch estimation with confidence
Frequency tracker (Composer)	Estimate incoming signal frequency	Frication Exciter	Airway-constriction noise excitation
Frog Membrane	Frog vocal-membrane model	Full-wave Rectifier (shader)	Fold negative waveform halves upward
Fuzzy Donut (recursion study)	Repeated audio-buffer processing	Gain	Adjust audio level
Gain (Composer)	Scale an audio signal	Gait Controller	Clock-driven coordinated locomotion
Gait Editor	Edit foot and limb timing	Gated noise band (struss: Industry II)	Cycle-shaped high-frequency noise
Gaussian Pair (shader)	Correlated Gaussian control pair	Gear Ratio Drums (instrument)	Meshed gears and tooth-triggered drums
Generation Audio Bank	Recursive microphone audio pathways	Generation Tree	Retain every recursive generation
Geodesic Drift (instrument)	Paths over curved surface metrics	Geometric Feedback	Retain visual-state feedback history
Geometric Feedback Lattice (shader)	Audio circulating through delay grids	Gesturama (instrument)	Camera tracking and painted zones
Gesture Path Player	Replay timed or distance-based strokes	Gesture Recorder	Record gestures and pen-up gaps
GPU Arpeggiator (shader)	Clocked scale arpeggios and gates	GPU Resource Bridge	Share GPU fields between apps
GPU Sampler / Granulator (shader)	Sample playback and granular scanning	GPU Shader Synths (instrument)	Six shader synthesis models
Grain Window	Shape overlapping grain envelopes	Grain Window (shader)	Periodic zero-ended grain windows
Graph Audio Router	Audio routing and graph feedback	Graph Delay (instrument)	Graph-routed delay, pitch and filtering
Graph Drum Machine (instrument)	Graph-propagated percussion triggers	Graph Editor	Edit instrument graph topology
Graph Motion	Animate instrument graph vertices	Graph Pulse Router	Timed pulse propagation through graphs
Graph Synth (instrument)	Graph pulses with inherited pitch	Graph to Notes	Graph traversal to musical notes
Graph Topology	Generate seeded directed graphs	Graph View	Show graphs and traversal contacts
Graph Voice Bank	Synthesize graph-generated notes	Graph Walk	Timed walks through directed graphs

Module	In brief	Module	In brief
Gravity Lens (instrument)	Gravitational lens image geometry	Gravity Walk (instrument)	Gravity-driven bead on contour
Gray-Scott Field	Reaction-diffusion field simulation	Grind (srtuss: Industry II)	Rough modulated noise sweep
Hand Cavity	Moving external hand-cavity resonance	Hanoi Carillon (instrument)	Disk-transfer moves as pitched events
Hard Sync (shader)	Master-reset slave oscillator	Harmonic bank (shader)	Bounded, bandlimited additive partials
Harmonic Exciter (shader)	Add controlled harmonic distortion	Harmonic pad (srtuss: DnB)	Additive chord with stereo echoes
Harmonicazoid (instrument)	Ten-hole blow/draw harmonica	Hash noise (shader)	Deterministic sample-coordinate noise
Hats (srtuss: Cipher)	Fast deterministic noise hats	Hats (srtuss: Noise Bands)	Offset hats and noise accents
Hats + ticks (srtuss: Shift)	Variable-level noise ticks	Height to Pitch	Vertical position to pitch
Hex / Triangle Lattice (shader)	Hexagonal crossings to gates/pitches	Hiccup Head (Composer)	Expressive modeled mouth voice
Hiccup Head (instrument)	Mouth, nose and cheek gestures	High tick (srtuss: Noise Bands)	Sparse high-frequency stereo ticks
Hocket Distributor	Distribute interlocking rhythmic voices	Hocket Luigi (instrument)	Shared pulse score across voices
Hole Aperture	Weight selected harmonica holes	Host MIDI Adapter	Connect MIDI within a host
Host Transport Adapter	Read host playback timing	Hull and Delaunay	Track hulls and triangulation changes
Hybrinx (instrument)	Multi-lane animal-call contours	Hyper (instrument)	Four-dimensional rotating forms
Hyper Drum Machine (instrument)	Four-dimensional intersections to drums	Hyper Rubix (instrument)	Tesseract-cell musical traversal
Hyper-Syrinx (instrument)	Anatomically controlled simplified bird voice	Hyperbolic Reflection	Hyperbolic disk reflection patterns
Hyperplane Reader	Scan four-dimensional edge crossings	Hyperpolyhedron Generator	Generate four-dimensional solids
Hysteresis Gate	Prevent boundary-trigger chatter	Impact Ecology (physical model)	Bouncing, shattering and scraping populations
Independent Rotation Control	Separate shape and reader rotation	Interference Field (shader)	Plane-wave interference controls
Interference Lattice (shader)	Interference patterns to gates	Intro bleep (srtuss: Boulder Dash title)	Bright section-triggered opening bleep
Isohedral Tile	Generate constrained isohedral tilings	Jaw Harp (instrument)	Plucked reed and mouth resonance
Jaw Jam (instrument)	Sequence plucks, sustains and rests	Jaw Reed	Plucked jaw-harp lamella
Jet Whistle	Air-jet whistle excitation	Juggling Model	Identified objects and juggling motion
Julia (instrument)	Playable transformed Julia boundaries	Julia Boundary	Trace Julia-set contours
Karplus Carpet (instrument)	Microtonal spatial plucked-string surface	Karplus Excitation	Seeded string-excitation impulses/noise
Karplus Strong (instrument)	Excited tuned-feedback string	Kick (srtuss: Cipher)	Section-triggered falling-pitch kick
Kick (srtuss: Noise Bands)	Pitch-drop kick with click	KIFS Fold	Iterated kaleidoscopic folding field
KIFS Fold Sequencer (shader)	Fractal folds as sequencer patterns	Kinetic Hull (instrument)	Moving-point hulls and triangulation
Klein Bottle (instrument)	Plane sections through Klein geometry	L-System (instrument)	Grammar-driven branching geometry
L-system Delay (instrument)	Generation-controlled recursive delay/pitch	L-System Drum Machine (instrument)	Branch traversal to percussion
L-System Frontier	Traverse final-generation branch contacts	L-System Geometry	Grammar symbols to branching paths
L-System Grammar	Expand recursive grammar rules	L-Systems (instrument)	Expandable generation-aware grammar instrument
Laser Woosh (shader)	Modulated chirp zaps and dives	Lattice (instrument)	Editable tile shapes and tilings
Lattice Drum Machine (instrument)	Tile contacts to drum assignments	Layer renderer (runtime proposal)	Render, detune and pan layers
Letter Mutation	Letters to anatomical changes	Level Meter	Measure and display RMS level
Level meter (Composer)	Observe audio signal level	Level Meter (shared widget)	Signal-level display widget
LFO	Sine-wave low-frequency modulation	LFO (Composer)	Low-frequency modulation source
LFO (shader)	Time-derived cyclic control motion	Line Reader	Scan geometry with a line
Linear Range Map (shader)	Normalized control to linear range	Linebreaker (instrument)	Line scans through fractal fields
Lip-Reed Bore	Coupled lip valve and bore	Lissajous Orbits (instrument)	Integer-ratio curves and phase scanning
Lissajous Ratio	Shared motion and interval ratios	Listening Probe	Listen inside a modeled body
Log Range Mapper (shader)	Proportional or octave control mapping	Log Spectrum	Logarithmic frequency-energy analysis
Log Spiral Events (shader)	Log-polar event bands	Log-Polar Warp	Warp tilings into log-polar space
Loop Recorder	Capture audio loops	Loop Ring Editor	Edit circular playback handles
Lumber Loops (instrument)	Microphone loops with ring controls	Lung Bank	Multiple identified lung-pressure sources
Lydian dyad (srtuss: Cipher)	Two gated Lydian sine voices	Machine echo (srtuss: Industry II)	Alternating machine-sound echo taps
Machine thump (srtuss: Industry II)	Short pitched-noise machine impacts	Macro Control	One control for several parameters
Mandelbrot Escape Field	Mandelbrot escape-value field	Massive Bank (shader)	Large oscillator and resonator banks
Metal accents (srtuss: Noise Bands)	Paired low metallic accents	Metal bed (srtuss: Noise Bands)	Slowly changing additive metal texture
Metal hits (srtuss: DnB)	Alternating hundred-partial metal hits	Metallic Hi-hat (shader)	Inharmonic metallic hat transients
Micromorph (instrument)	Streaming effects with timed controls	Microphone	Receive enabled microphone audio
Microphone Formant Follower	Vocal features to tract controls	Microtonal Carpet	Microtonal playable pitch surface
Mid / Side Width (shader)	Mid/side stereo-width processing	MIDI Clock	Bridge transport and MIDI timing
MIDI clock (Composer)	Generate MIDI clock messages	MIDI In	Receive MIDI notes and controls
MIDI input (Composer)	Receive hardware or keyboard MIDI	MIDI Learn	Assign hardware MIDI controls
MIDI Monitor	Inspect MIDI messages and ownership	MIDI Out	Send notes to MIDI devices
MIDI output (Composer)	Send owned MIDI messages	MIDI Router	Route selected MIDI message types
MIDI router (Composer)	Filter and route MIDI streams	Midi Status (shared widget)	MIDI connection and activity display
MIDI to control (Composer)	MIDI messages to numeric controls	MIDI to frequency (Composer)	MIDI pitch to frequency
Mirror Fold Sequencer (shader)	Mirrored coordinate pitch sequencing	Mixer	Combine owned audio sources
Mixer (Composer)	Mix routed audio sources	Modal Bank	Individually identified resonant modes
Modal JSON Adapter	Import/export modal sound banks	Modal Metal (shader)	Decaying inharmonic metal resonances
Modal metal (SIMD source)	Inharmonic resonator synthesis bank	Model dispatch (runtime proposal)	Select a layer's synthesis model
Model Morph	Crossfade compatible running models	Modular Shader Synth (workbench)	Typed, nestable shader-module workbench
Modulation Matrix	Four configurable modulation routes	Moire Coincidence	Detect moving-lattice coincidences
Monstrozoid (instrument)	Editable organs and lung pressures	Morph Crossfade (shader)	Equal-power stereo signal morphing
Morphazoid Composer (workbench)	Expandable devices with public ports	Morphazoidal (workbench)	Geometry, reader and feature workbench
Morphynx (instrument)	Persistent bird/larynx voice morph	Motion Mode Group (shared widget)	Choose exclusive motion modes
Mouth Aperture Control	Direct mouth-opening control	Mouth Bow	Mouth-resonated bowed string
Mouth Genome	Gene-driven mouth anatomy	Mouth Harmonic Selector	Select mouth-emphasized reed harmonics
Mouth Radiation	Sound radiation at tract outlet	Mouthophones (instrument)	Six breath-driven mouth topologies
Moving Delay Head	Move an audio delay head	Möbius (instrument)	Plane sections through Möbius geometry
Multiple Source and Mouth Router	Route coupled sources and mouths	N-Queens Backtracker (instrument)	Queen-placement search and conflicts

Module	In brief	Module	In brief
Nasal Branch	Coupled nasal airway branch	Nested Envelope	Parent-child envelope timing
Nested Time Editor	Edit nested envelope timing	Neural Processor (shader)	Fixed-weight neural-style sound model
Neural Pulse (instrument)	Weighted-network activation sonification	NightingaleManifold (instrument)	Birdsong segmentation and acoustic features
Noise kick (srtuss: DnB)	Short rhythmic noise kick	Nonorientable Surface	Surface sheets and orientation seams
Normalized Route (shader)	Normalize, invert and blend controls	Note Controller	Manage note attacks and releases
Number Stepper (shared widget)	Bounded numeric step control	Numeric control display (Composer)	Display numeric control values
Object Forge (physical model)	Strike material and modal objects	Occupied-Run Detector	Detect occupied spans and gaps
Occurrence Route Player	Traverse recorded-event similarity routes	Octave Gate Hierarchy	Nested gates across octave rates
One-Shot ADSR	Complete envelope from one trigger	Onset Detector	Detect distinct audio attacks
Open Baker Map	Open triadic baker-map evolution	Operation to Music	Map algorithm operations to music
Option Card Group (shared widget)	Labeled instrument-option cards	Oral Branch	Coupled oral airway branch
Orbit Trap	Measure fractal orbit proximity	Orbital Slice	Orbital slice fields and nodes
Order Tones (instrument)	Modular repetition and quantum probabilities	Organ Graph Editor	Edit connected anatomical organs
OSC Bundle Adapter	Timed and bundled OSC messages	OSC In	Receive scalar OSC controls
OSC Out	Send scalar OSC controls	Oscillator	Basic periodic audio waveforms
Oscillator (Composer)	Generate pitched audio	Oscillator (shader)	Periodic waveform with phase offset
Oscilloscope	Inspect signal waveform shape	Oscilloscope (Composer)	Display audio waveforms
Ouroboros (instrument)	Shepard percussion with register wrapping	Ouroboros Borealis (instrument)	Shepard pitch meets Risset rhythms
Ouroborousel (instrument)	Pitch-chunk and cyclic drum banks	Ourorourobouroboros (instrument)	Octave pulse rings with nested gates
Output (Composer)	Send audio to output	Output (shader)	Stereo output gain and limiting
Output Device	Choose session audio output device	Overlap-add / overlap-save (runtime proposal)	Rejoin processed audio blocks
Overtone Focus	Choose tract-emphasized overtones	Packing Pressure (instrument)	Compressed disks and contact graphs
Paddle and Caisson Driver	Wave-pool paddle and caisson excitation	Painted Parameter Field	Paint note and timbre fields
Paired Blow and Draw Reeds	Independent blow and draw reeds	Parallel phase integration (runtime proposal)	Integrate frequency into continuous phase
Parallel scan for recurrences (runtime proposal)	Parallel evaluation of supported recurrences	Parallel Voice Bank (shader)	Independently pitched, drifting stereo voices
Partial Transfer Filter (shader)	Per-partial harmonic filtering and phase	Particle Cabinet (physical model)	Particles shaking inside resonant bodies
Particle Cloud (shader)	Sixteen pitched oscillator grains	Particle cloud (SIMD source)	Pitched dust and noise textures
Paths (instrument)	Space-filling curves and seeded walks	Pendulum Wave (instrument)	Related-period pendulum phase patterns
Penrose Presentations	Five Penrose tiling constructions	Penrose Tilings (instrument)	Penrose tilings with unique edges
Performance Binding	Bind widgets to graph parameters	Performance Roulette	Rotate performers through shared stages
Peristalsis	Traveling digestive muscle contractions	Phase Bank	Related, independently identified phases
Phase Delay	Offset one pattern against another	Phase Distortion (shader)	Bend oscillator phase slope
Phase Labyrinth (recursion study)	Nested all-pass phase chambers	Phase Observer	Measure simulated phase relationships
Phase Plane (shader)	Time-driven two-dimensional trajectory	Phase sweep (srtuss: Industry II)	Programmed nonlinear phase sweep
Phoneme Block Editor	Edit generated pronunciation blocks	Phoneme Join	Join consonants and sustained vowels
Phonic Lip Source	Dolphin phonic-lip vocal source	Physical Drum Bank	Geometry-triggered physical percussion
Physical Edge Deduplicator	Prevent duplicate geometric edge attacks	Physical Network Compiler	Compile coupled physical sound parts
Physical Phone Voice	Phoneme-driven physical vocal tract	Pink Trombonazoid (instrument)	Editable word-to-phoneme vocal score
Pitch Quantizer	Quantize pitch to chosen tuning	Pitch-drop kicks (srtuss: Shift)	Phase-offset pitch-drop kick patterns
Pitch-Rate Trajectory	Fixed or gliding audio readheads	Plane Reader	Scan solids with a plane
Plasma Ball (instrument)	Globe-surface branches and route selection	Playhead Paint (instrument)	Draw and replay timed gestures
Plosive Exciter	Vocal-tract consonant bursts	Plugazoid (instrument)	AudioWorklet effect hosting
Point Reader	Point-based geometry playhead	Polar Fold	Radially symmetric coordinate repetition
Polar Fold (shader)	Kaleidoscopic angular coordinate folding	Polar Kaleidoscope (shader)	Radial palindromic pitch patterns
Polar Pad	Circular gesture control surface	Polyhedron Generator	Generate three-dimensional solids
Polynomial / Chebyshev shaper (shader)	Polynomial harmonic waveshaping	Polyphonic Voice Bank	Polyphonic note-driven synthesis
Pose Editor	Edit articulated body poses	Position to Pan	Position to stereo pan
Position to Speaker Gains	Position to speaker gain weights	Preset Bank	Recall named preset collections
Preset Morph	Morph compatible instrument settings	Preset Reconstruction	Rebuild source presets as graphs
Preset Variation	Seeded selected-parameter variations	Pressure Gesture	Play authored pressure curves
Pressure Gland	Identified airway pressure source	Prime Sieve (instrument)	Prime discoveries and sieve eliminations
Probability Observer	Read simulated probability measurements	Procedural Bird Flock (shader)	Stereo bird chirps and trills
Procedural Kick (shader)	Pitch-drop kick with separate click	Procedural Snare (shader)	Shell modes, noise and snare snap
Projection	Project geometry while retaining coordinates	Propagation Scale	Set physical sound-propagation length
Prototile Editor	Edit valid tiling shapes	Public Input	Expose a typed subpatch input
Public Output	Expose a typed subpatch output	Puggler the Punk Rock Jugger (instrument)	Multi-performer juggling and catch events
Pulse + sub bass (srtuss: noir et blanc)	Pulse bass and long sub-bass	Pulse and Chirp Analyzer	Separate pulse and chirp events
Pulse bass (srtuss: Shift)	Section-transposed pulse/sine bass	Pulse Ownership	Track rhythmic event ownership
PWM lead (srtuss: Cipher)	Section-triggered pulse-width lead	Quadruped (instrument)	Species-specific clocked walking patterns
Quantum Square Dance (instrument)	Paired-spin exchange sonification	Radar Reader	Rotating-ray geometry playhead
Random-walk Arpeggiator (shader)	Repeatable bounded pitch walks	Range Field (shared widget)	Labeled slider control
Range Map	Map between numeric ranges	Rattle Snake Skin (instrument)	Paint notes, glissandi and rings
Rattlesnake (instrument)	Morphing modal, FM and string percussion	Raymarch Resonator (shader)	Raymarched shapes to resonant structure
Reaction-Diffusion (instrument)	Reaction-diffusion spots and bands	Reaction-Diffusion Score Lattice (shader)	Chemical field as musical controls
Reader Bank	Group independently controlled playheads	Recombobulator (shader)	Reshuffle folded audio-history routes
Recorder (Composer)	Record a routed audio signal	Recursion (instrument)	Recursive processing of audio seeds
Recursive Filter (shader)	Stateful recursive audio filters	Recursive FM	Nested integrated frequency modulation

Module	In brief	Module	In brief
Recursive FM (instrument)	Nested FM with depth morphing	Recursive PM	Recursive oscillator phase offsets
Recursive PM (instrument)	Depth-weighted recursive phase synthesis	Reflection Bank	Reflected polyphonic gesture copies
Region Crossing Detector	Tracked region crossings to events	Region Editor	Edit interactive performance regions
Resonant Body	Reusable physical body resonance	Reusable Instrument Panel	Instrument panel at multiple depths
Reverb	Reusable room reverberation	Reverb (Composer)	Room or space response
Reverse and Transpose	Reverse playback and transpose pitch	Rhythm and Pitch Fusion	Bridge rhythmic and pitched repetition
Ricochet (instrument)	Bouncing balls in editable arenas	Rig and Pose	Persistent articulated body rig
Rigidity (instrument)	Pinned bar-and-joint constraint simulation	Ring modulator (shader)	Sum/difference frequency multiplication
Ring Player	Independent ring-based sample playback	Risset Rate Bank	Overlapping octave-related tempo layers
RISSET-MOIRE (instrument)	Intersect rising/falling Shepard lattices	Roach Synth (instrument)	Articulated roach poses and motion
Robot Glands	Artificial anatomical pressure sources	Robot Voice (shader)	Metallic vowels and machine articulation
Rolling Measure (instrument)	Rolling polygons and centroid motion	Root bass (struss: Cipher)	Paired low root tones
Rounded-edge Oscillator (shader)	Rounded saw/square oscillator edges	Rubix Cube Sequencer (instrument)	Cube-sticker musical sequencing
Sample + Hold (shader)	Random stepped controls with glide	Sample Drum Bank	Identified replaceable drum samples
Sample Drums (instrument)	Sixteen-slot editable sample kit	Sample Pad	Performance pads for sample slots
Sample Player	Note-controlled sample playback	Sample-rate Reducer (shader)	Reduce audio sampling rate
Sampler and Granulator	Recorded-sample playback and granulation	Sandy Syrup Delay (instrument)	Staggered granular delay heads
Saturation	Bounded nonlinear saturation	Scrape Exciter	Sustained scraping excitation
SDF Logic	Combine signed-distance geometry fields	SDF Logic (shader)	Union, intersect and subtract fields
SDF Pattern	Signed-distance geometric shape field	SDF Pattern (shader)	Repeated shapes and contour gates
SDF Shape Sequencer (shader)	Scan shape boundaries for notes	Seam and Lap Tracker	Track nonorientable seams and laps
Seeded Timbre	Repeatable timbre per cell	Seeded Walk	Seeded geometric walking paths
Segment ADSR (shader)	Sample-timed ADSR envelope	Select Field (shared widget)	Labeled selection control
Sequence Lane (shader)	Persistent 128-value score lane	Shader Module Host	Host compatible shader modules
Shape (instrument)	Editable transformed shape contours	Shape Drum Machine (instrument)	Shape contacts to drum strikes
Shape Geometry	Editable two-dimensional shape contour	Shape Reader	Independent point, line and radar playheads
Shape to Voices	Shape contacts to voices/notes/drums	Shapes (instrument)	Expandable 2D, 3D and 4D instrument
Shapes View	Direct shape performance controls	Shared Music Room	Shared musical performance session
Shepard / Risset Spiral (shader)	Endlessly rising or falling tones	Shepard Bank	Overlapping octave voices with wrapping
Shepard Percussion	Octave-wrapped percussion bodies	Shepard Resynthesizer	Input resynthesis through slipping octaves
Shepard–Risset (instrument)	Cyclic octave-layer pitch illusion	Ship Navigation	Flight and listening-position simulation
Short smear taps (struss: Boulder Dash title)	Three short tracker-voice echoes	Sierpinski Field	Sierpinski carpet-like field
Signal Monitor (shared widget)	Display a selected runtime signal	Signed Breath	Signed inhale/exhale control
SIMD 303 (instrument)	Acid score with harmonic shaping	SIMD Audio Lab (alternate ui)	Alternate resonator lab and inspection
SIMD Resonator (instrument)	Material resonances from strike position	SIMD SYNTH (instrument)	Two-source configurable synthesis instrument
Similarity Recursion	Repeated similarity transformations	Simple Delay (shader)	Fractional-delay stereo echoes
Sliding Puzzle (instrument)	Constrained sliding-tile sequencer	Sliding-DFT Resynth (shader)	Continuously analyzed spectral resynthesis
Slippery Resynthesis (instrument)	Log-spectrum analysis and band tracking	Slope Inheritance	Parent slopes to inherited pitch
Smoother	Smooth abrupt control changes	Snare (struss: Cipher)	Section-triggered decaying noise snare
Snare + fill (struss: DnB)	Noise/tone snare with rhythmic fills	Snare noise (struss: Shift)	Four-step decaying noise hits
Soft clip (shader)	Smooth peak compression and harmonics	Solid (instrument)	Rotating polyhedra and profile prisms
Solid Drum Machine (instrument)	Solid-plane intersections to drum contacts	Sorting (instrument)	Five sorting-algorithm musical traces
Source Combiner	Combine synthesis sources	Space-Filling Path	Generate space-filling geometric curves
Spatial Strike	Strike position to resonant modes	Speaker Array Editor	Position identified output speakers
Speaker Layout	Describe arbitrary speaker arrangements	Spectral Acid (shader)	Harmonic acid-oscillator cutoff/resonance
Spectral Fabric View	Edit the audible frequency field	Spectral Gate (shader)	Suppress quiet spectral bins
Spectral Möbius (recursion study)	Recursive upper/lower spectral folding	Spectral Propagation	Propagate changes through spectral lattices
Spectral SDF (shader)	Signed-distance shapes over spectral bins	Spectral Transport (shader)	Band remapping and pitch resynthesis
Spectral Vocoder (shader)	Thirty-two-band spectral envelope transfer	Spectral Window	Weight moving-register spectral layers
Spectrum / FFT (Composer)	Measure and display spectral energy	Spectrum Analyzer	Frequency-domain signal analysis
Spelling Synthesizer (instrument)	Typing-driven contextual phoneme performance	Spermacti Path	Sperm-whale acoustic pathway
Spiral (instrument)	Log-polar warped tile patterns	Spiral Drum Machine (instrument)	Spiral-tile contacts to percussion
Spray Exciter	Spray sound excitation	Spring Choir (instrument)	Coupled springs and normal modes
struss Master (instrument)	Translated scores with selectable parts	Stage Handoff	Transfer shared performance control
Standalone Playhead Handles	Direct independent playhead manipulation	Standalone Shape Handles	Direct reusable shape manipulation
Star Generator	Generate star geometry	Stateful Field Processor	Process persistent field history
Stateful Spectrum Processor	Ordered spectral processing with latency	Status Readout (shared widget)	Read-only state display
Stem Export	Export aligned audio stems	Stem Recorder	Record synchronized separate channels
Step Button (shared widget)	Increment/decrement button	Step Sequencer	Clock-driven editable sequence lanes
Stereo delays (struss: Shift)	Short cross-channel echo taps	Stereo feedback (struss: Cipher)	Alternating tonal feedback echoes
Stereo Pan	Position audio in stereo	Stereo sparks (struss: Gravity Shielding)	Rapid alternating spark impulses
Stochastic body (struss: Shift)	Noise-weighted additive partial bank	String Loss and Dispersion	String-loop damping and dispersion
String Pickup	Read a chosen string position	String-Wind Exciter	Quill-driven string excitation

Module	In brief	Module	In brief
Stripe Reader	Fractal escape bands to motion	Striped Staircase (instrument)	Mandelbrot escape-depth stripe scanning
Strophe Timeline	Birdsong events on recording timeline	Supersaw Unison (shader)	Detuned, drifting stereo oscillator unison
Surface Metric	Measure movement on curved surfaces	Surround for Safety (instrument)	Speaker layout and spatial gain control
Surround output (Composer)	Labeled multichannel audio output	Survivor Set	Track trajectories remaining in maps
Sustained Phone Sample	Hold and join phoneme recordings	Swept impact (srtuss: Gravity Shielding)	Noise attack with phase-swept impact
Swing	Alternate long/short rhythmic timing	Swing clock (Composer)	Swung clock-pulse timing
Syllable Analyzer	Find syllable events in recordings	Syllable Note Editor	Edit sung-word note scores
Syllable Score	Sequence vowels and consonants	Sympathetic String Bank	Sympathetically excited secondary strings
Syrinx (instrument)	Animal calls with pressure/tension gestures	Syrinx UI · Morphazoid (alternate ui)	Alternate bird-voice control panel
Tesseract Score	Sequence selected tesseract boundary cells	Text Keyboard	Typing as musical input
Text to Phones	Text to editable phoneme identities	Texture metal (srtuss: Gravity Shielding)	Thirty texture-driven metallic partials
Throat Singing (instrument)	Drone with paired tract constrictions	Throatzoid (instrument)	Editable tract with glottal/mic excitation
Thunder / Impact Cell (shader)	Crack, resonant impact and thunder	Tile + Mirror (shader)	Repeat and mirror coordinates
Tile Class Mapper	Tile classes to musical assignments	Tile Score	Serial or parallel tile playback
Tiles (instrument)	Expandable lattice and spiral instrument	Time-Frequency Paint Surface	Paint time, pitch and timbre
Tine Pull and Pluck	Manual and sequenced reed plucks	Tissue Valve	Pressure-driven vibrating tissue valve
Tom (srtuss: Cipher)	Short falling-pitch tom	Tone cloud (srtuss: Gravity Shielding)	Stochastic tones with sine wobble
Tongue Anatomy	Generate tongue anatomy	Tongue Block	Mute selected harmonica holes
Tongue Handles	Direct tongue-shape manipulation	Tongue Motion	Sequence tongue motion curves
Tongued Beasts (instrument)	Tongue anatomy and motion presets	Tooth Picker	Select individual tooth voices
Tooth Tine	Pitched vibrating tooth tines	Tracked-Color Display	Visualize detected tracking colors
Tracker lane A (srtuss: Boulder Dash title)	First 128-step tracker lane	Tracker lane B (srtuss: Boulder Dash title)	Second 128-step tracker lane
Transition riser (srtuss: DnB)	Metallic section-transition riser	Transport	Shared tempo and playback state
Transpose	Shift musical pitches	Trigger / Impulse (shader)	Sample-timed pulses and impulses
Truchet Path Sequencer (shader)	Arc-tile paths to sequenced gates	Truchet Router	Route patterned tile paths
Truchet Router (shader)	Arc proximity to tile gates	Tuned String	Tuned feedback-delay string
Turn to Pitch	Geometric turns to pitch intervals	Turtle Interpreter	Symbols to branching geometry
Two-channel mix (shader)	Equal-power two-route mixing	Two-Mass Folds	Two-mass mammalian vocal folds
Typing Dynamics	Typing timing as performance control	Unit Converter	Convert frequency, angle and units
Uploaded Wavetable (shader)	Play and morph uploaded waveforms	UTAU Bank Adapter	Import vocal-bank timing and pitch
Value	Fixed numeric control	VCA (shader)	Control-driven audio gain
Vector bytebeat (SIMD source)	Vectorized integer-rhythm synthesis	Vector Flight (instrument)	Ship navigation and listening contour
Vector table (SIMD source)	Sine, triangle and saw morphing	Vector Wavetable (shader)	Fourier waveform-family morphing
Velocity Mapper	Gesture strength to musical expression	Ventricular Fold Divider	Ventricular-fold period division
Vibrato (shader)	Moving-delay periodic pitch modulation	Visibility Gate	Gate hidden stickers and cells
Vocal Effects Room	Shared vocal-effects performance	Vocal-Tract Profile	Describe vocal-airway geometry
Vocalzoid (instrument)	Pronunciation and pitched syllable scores	Vocoder	Transfer envelopes to a carrier
Voice / layer mix reduction (runtime proposal)	Combine rendered voices into channels	Voice source (Composer)	Configurable synthesis voice
Voronoi Cell Sequencer (shader)	Voronoi cells as irregular sequences	Voronoi Events (shader)	Cell identity and boundaries to events
Voronoi Field	Nearest-cell regions and boundaries	Wallpaper Group	Repeat motifs through planar symmetries
WASM and SIMD Backend	Choose audio execution backend	Wave Pool (instrument)	Driven water-wave physical model
Wave State	Maintain slow water-wave state	Wavefield Solver (shader)	Stateful string, membrane and room models
Wavefold stack (SIMD source)	Layered folded waveforms	Wavefold Table Oscillator (shader)	Detuned waveform layers with folding
Wavefolder (shader)	Fold waveforms to add harmonics	Waveform Editor	Edit sample waveform boundaries
WebGPU 303 (Composer)	GPU acid-synthesis voice	WebGPU 303 (instrument)	Acid steps and parameter lanes
WebGPU Chiptune (instrument)	Shader-scored chip, drum and noise voices	Weierstrass (instrument)	Fractal oscillator, FM and PM modes
Weierstrass Bank	Exponentially spaced oscillator sums	Wheel of Organs (instrument)	Letter-generated organs on radial wheels
Whirlpool Exciter	Aerated vortex sound excitation	Wing Exciter	Body-driven procedural wing sounds
Wing-Mode Resynthesizer	Cricket resynthesis through wing modes	Worker Audio Adapter	Bounded worker-based audio processing
Worklet Adapter	Host compatible AudioWorklet processors	Wormhole Manifold	Internal vocal-airway shortcut histories
XY Pad	Two-axis parameter control surface	Yo-Yo Model	Constrained yo-yo and string simulation
Yoyodyne (instrument)	Yo-yo throws, binds and tricks
